Forecast for Tuesday 23 Mar 2021

Weather: Becoming quite cloudy overnight but generally dry. A cloudy day with a few outbreaks of drizzle where the cloud thickens in the west of the Brecon Beacons, best conditions to be found in the east where there may be a few bright or sunny spells. Some rain is expected later in the evening.

Chance of cloud free mountain/hill tops above 600m: 60% some low cloud associated with the moist southwesterly airstream over the area.

Visibility: Visibility will be quite poor at times higher on the hills in any drizzle. In the west cloud bases will be scattered around 600m, in the east cloud will be more patchy but might shroud the tops from time to time but also some long cloud free breaks for the tops during the day. In drizzle, visibility will be poor for a time and good navigation aids may be required.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

A significant wind chill as winds strengthen during the morning with strong gusts on the highest tops in the afternoon. Freezing level mainly above the summits.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
15:00 on Mon 22 Mar 2021	0.2mm	0.2mm	0.2mm

Forecast for Wednesday 24 Mar 2021

Weather: Generally a bright and breezy day but feeling cooler. Some sunny intervals are likely but cloudy at times too and a few showers are possible.

Maximum wind: Southwesterly 15mph with gusts 25mph.

Chance of cloud free mountain/hill tops above 600m: 80-90% most cloud will be well above the summits.

Visibility: Generally very good visibility with far reaching views but there will be patches of low cloud at times around 600m and more so around any showers that may form over the tops, when the overall visibility may dip to moderate or poor for a time.

Temperature: **Valleys:** Plus 4 rising to 9 Celsius.
At 600m: Plus 4 Celsius.
Freezing level:1300 falling to 1000m
